

# repsign 1.1.0

---

repsign replaces one single character or a text string with an other character or text string in the names of all files in a given directory. By, default it will replace all quotation marks in the file names with an underscore.

## Calls

---

1. `repsign`
2. `repsign <one_character>`
3. `repsign <one_string> <an_other_string>`
4. `repsign <path> <one_string> <an_other_string>`
5. `repsign -h|--help`

## Explanation of Calls

Call the programm with `repsign --help` to get more information.
